Details

Description

The UK company has carried out cinema projects in the U.K. and abroad since 1989. It is comprised of a team of highly skilled and motivated designers and project managers who are well-informed in contemporary cinema ideas and keep up to date with the latest technical developments.

Due to increased demand in their services the UK company is looking for specialist subcontractors that can provide architectural services for their cinema design and project management business.

The UK company would also like to source new suppliers (manufacturers) of cinema fittings, furniture and innovative equipment that they could incorporate in their designs.

Advantages and Innovations

The UK company has carried out cinema projects in the U.K. and abroad since 1989 delivering a wide range of high profile projects using their extensive experience, technical skills, creative flair and commercial understanding to bear in the successful implementation of projects.

The UK company's talented and dedicated team can advise on: multi-format film and video installations, digital multi-channel audio systems, satellite and terrestrial reception, integrated theatre control systems, acoustic treatments, sound isolation and room equalisation.

Having also designed, built and commissioned installations for major Internet Service Providers, the team is fully skilled in all aspects of the computer IP networks which underpin more and more of their most modern installations.

The UK company's portfolio of clients include private clients looking for a unique and distinctive solution for their home cinema , film distributors, hotel, corporate and educational institutions, international investors and property developers and independent cinema operators.

Technical Specification or Expertise Sought

The UK company is looking for subcontractors that can provide specialist services in the design and installation of cinemas (architects).

Manufacturers that provide innovative products such as digital equipment, screens, cinema seating (for indoor and outdoor use), signage, front of house sales and other furniture and equipment for cinemas are also required.

Technology Request

Spanish company looking for a smartwatch manufacturer with specific features

Summary

Spanish company, specialized in software development for wearables technologies, is looking for a partner capable of manufacturing a smartwatch with certain technical specifications. The company is looking for manufacturing agreement.

Expiration Date 12 April 2017
Reference TRES20151014001
Profile link

Details

Description

The market of wearable technologies is rapidly growing up through smart glasses, smartwatches, armband bracelets, intelligent clothing, augmented reality, health bands, etc. All of these devices are in need of apps in order to provide the best experience to users.

Because of that, the past few years, the Spanish company has developed a wide range of applications for wearable technologies intended to different sectors such as medicine, retail, tourism, emergencies, security, etc.

Next step for the Spanish company is the launching of its own smartwatch with the features stated in the “Technical Specification or Expertise” field.

The company is looking for a partner able to manufacture a smartwatch that incorporates the previous features under manufacturing agreement. Additionally, prior to the production process the desired partner should be able to provide a rough estimation of both fixed cost (design, firmware development, tooling, samples, etc.) as well as a rough estimation of the variable cost (cost per device when manufacturing).

The estimated production starts with 2.000 units and is expected to reach one million within two years and the time-to-market production must be eight months.

Technical Specification or Expertise Sought

-Heart rate
-Touch screen
-Speaker
-Microphone
-SIM & Network (2.5/3G)
-IP68 (water and dust resistant)

-Bluetooh 4.0 BLE (Bluetooth Low Energy)
-Pedometer
-NFC (Near field Communication)
-Accelerometer
-Gyro
-Battery (min. 2 days)
-SO Android

Details

Description

Polish SME is a tech start-up, an independent hardware and software developer. Polish company is a team that wants to change the rules of the game on the kitchen appliances, IOT (Internet of things) and smart houses markets.
Polish SME is developing and working on device which is going to be present in the majority of houses around the world...so are computers, smartphones, tv sets, fridges or dishwashers. Like these household appliances, Polish SME's device is going to significantly improve the comfort of our daily life.
Big idea behind - it is used to present the rules of the original and the most effective way to pass on knowledge which has been completely omitted and neglected in the culinary field. This solution is changing it.

Polish SME's device opens up a whole new segment of devices. It can not be classified either as a household appliances, or as a mobile device. This solution derives from each of these domains, defining a whole new segment of "personal kitchen appliances".

Polish SME is looking for small and medium-sized enterprise, industrial or academic partners, which have a knowledge and experience in optical bonding field and can offer a technology or service meet their demands. The company is interested in cooperation in the form of commercial agreement with technical assistance or technical cooperation agreement.

Technical Specification or Expertise Sought

- sizable coverage surface (520 x 590 mm)
- 5 mm adhesive thickness
- Non-yellowing adhesive

- Adhesive resistance to high temperatures (80 Celsius constant in normal work mode, resistance to temporary temperatures near by 280 Celsius)

Business Request

Young Dutch fashion label for anti-odour clothing seeks manufacturing partners

Summary

A Dutch company is looking for a clothing workshop that is interested in a manufacturing and/or subcontractor agreement to manufacture clothing with specialist anti- odour fabrics. The partner should preferably be able to offer a complete solution, this means cutting, sewing and manufacturing the products according to given instructions such as patterns and templates The company should preferably have some kind of organic certificate for their fabrics.

Expiration Date	22 June 2017
Reference	BRNL20160530001
Profile link	

Details

Description

A Dutch company started to design and produce high quality anti -odour clothes in 2015. The SME's long term ambition is to offer a large collection of high quality anti odour clothing. The clothes are known for their comfort, sustainability but one of the major features is the fact that the garments have anti-odour characteristics.

The Dutch company is looking for a clothing workshop that is interested in a manufacturing and/or subcontractor agreement to produce the anti-odour clothing. The clothes should be suited for men and women and the range consists of several types of clothing, such as coveralls with hood. In due course the range will be extended with pants, shirts, jackets and headgears. The first collection consists of the core type of clothing, but the number of different clothing items will increase over time. Initial orders will be around 100 items of each clothing type. Manufacturers in the Baltic countries, Poland, Portugal and Turkey are especially of interest.

Advantages and Innovations

The Dutch SME, with her innovative clothing line, found a solution for people who work in environments that are characterised by high pungent odour emissions. The textile ensures that odours are stored externally, so that skin, hair and under garments remain odour free. The company is constantly working to optimize the product in order to extend the lifetime and also make it suitable for industrial Laundromats.

Technical Specification or Expertise Sought

The Dutch company is interested in finding a clothing workshop that preferably should be able to offer a complete solution, including cutting, sewing and manufacturing the products according to given instructions, patterns and templates. The partner should be able to manufacture small batches, as little as 50 and up to 200 items of each product type, for the initial order.
